Technol is basically a new company started in December of 2018 by two college students, where the main aim was to develop an organization which basically revolutionizes the technological domain which includes how college students are being trained for the industry and how able they are creating an impact on the industry. It is a well known fact that the colleges have lost their ability to create the engineers we need.

Technol is set to change this with its's new approach to the Trainings.

When we say " Technol is a organization for the students, by the students and to the students." We mean this .

We have two parts to our working:

1. The training part which includes practical teaching of the students of school and colleges in the latest technologies. That will make them more able as a engineer or even a technocrat.

2. The other part of our organization is to create future ready projects which will enable businesses to solve their problems and give them more outreach.

Technol is basically "Technology for All", Because all our products and services are at a much lower prices than all others in the market. We remove all the fanciness and just talk technical to enable us to cut all the extra expenses.

Home Page :

The home page should contain the basic introduction of the company and basic essence of what we do. The main aim of the company in short or what you feel will enhance the UX.

Link to other pages may be included.

The figures in a **6 month time span** that can be shown are :

10+ client-Projects done

100+ students trained

4+ indigenous projects

You can include some of our associated clients, we can provide the details.

You may also include that we operate in two countries India and Nepal.

Anything else you feel like adding we will provide you.

Services :

Our company provides various services to the individual customers and businesses at a very reasonable and affordable price. Some of the major services that we deal in are :

1. **Portfolio Websites :** Develop one page websites for yourself on your named domain (Nepal citizens get a domain on their name so that's why this is very prevalent in the Nepali Market) showcasing yourself and putting yourself on the market. This is the modern form of a resume where the world can see all of your achievements.
   Get in touch to know more.

2. **Website Designing:** Get a website for your business and make it global. Optimize your operations and serve your customers better. We make world class websites and help you reach a larger market. We provide a lot of other additional options along with designing your websites contact us to know more.

3. **Mobile App Development :** Take your business to customer's pockets with Techol made mobile apps. We design apps that improve your user's experience with you increasing user retention and loyalty. Get in Touch to know more.

4. **Software Solutions :** Allow Technol to solve your management and data Problems through Technol made management softwares that ease up your daily operations and increase efficiency of the organization.

We make our software according to your needs and solve every bit of your problems. Get in touch to Know mor.

6. **Home Automation :** Step in to the future and make your home or business environment future ready through Technol Automation. We design it according to you in a very flexible manner that too in the affordable budgets. Contact to get a quote.

7. **Technical Solutions :** For any of your other needs just get in touch with Technol and we may have the perfect product waiting for you.

You can add other details if you want to. Also you can mention that to get pricing details all you have to do is contact us through mail or phone or just fill the contact form . This you can write in whatever you feel comfortable. If you want to add client reviews we can get you that also.

Trainings Page : Technol provides trainings in multiple disciplines which includes the most in-demand Technologies of Industry. All of these trainings have advantage of Life-time **TECHNOL Membership which includes:**

1. Lifetime Technical and project support.
2. Internship opportunity with Technol in our Projects and become a part of our ecosystem.

The three boxes that are available already in the our programs section of the pre-existing website and their content should be used in whatever manner you feel comfortable.

The main Technologies that we deal are basically divided based on the type of student whether he is from college or school :

School Students :

1. **Robotics (The Robo King):** Learn the basics of robotics and robot building. Learn about Arduino and how to interact with the software. Learn about the various hardware component and how to bring them to use. The Robotics module for the School going students is specifically designed to bring in more practicality to the teaching and is taught in a way that the students can easily learn it. The students learn with a hand on experience.

2. **Website Designing (The Web King):** come be a part of the World of Internet by learning how the internet works and how to design websites for the Internet. Learn the basics of Web development like HTML , CSS and other technologies and create your own website ready to be published to the Internet.

3. **The Basic Beginner :** We help the students in learning the basics of the Computer and its various Technologies. Get introduced to some of the more common technologies of IT industry. This course is customizable according to the needs. This includes C/C++, Java, Python and some other Technologies.

Colleges:

For College students we have a number of options to choose from :

1. **Robotics –Amateur mode :** Learn the basics o f robotics and get introduced to this wonderful world. You start off from the basics of electronics and then get introduced to Arduino. By the end of this course you will be able to design your own circuits and make machines that are capable of solving real world problems. We have a project based approach to our teaching and bring in more practical and problem solving approach.

2. **Robotics with IOT– Legendary mode:** Jump right off into the Advance Robotics department with more advanced projects. Learn about IOT and its basics. Learn about working with cloud. Learn about home automation and make projects that require you to work out your brain cells.

3. **The Python Catcher :** Learn the most advanced and yet easy to learn language that has unlimited possibilities. Create GUIs and learn how to work with APIs. Learn the art of scraping the internet. Learn

to build backend support for your websites through Frameworks. Create exciting projects by in real time and become a GitHub star.

4. **Data Analysis and Machine Learning :** Heard about AI and Machine learning but don't know what that is and how it works. Learn it with Technol where we help you to start off from the basics. You learn not just the implementation but also the concept behind every aspect of Data Analysis. Make your own Prediction machines and enter the exciting world of Artificial Analysis.

5. **The Website Maker :** Get the Complete website Development package. Learn to create Internet Ready websites with the latest technologies. We don't teach you just one language but a combo of all. Learn HTML, CSS, JavaScript, ANGLUAR JS, PHP and many other. Get introduced to WordPress and other essential tools of website development.

6. **Android Development:** Learn the Basics of Java language and it's implementation in The Android APP Development. Make Exciting mobile applications by implementing all that you learn with us. Learn how to deploy your apps on the google play store.

All of these courses will have a course details button which should open a attached pdf that will be provided by us and will contain further details.

We can also add the student review on this page. We have the data for that too.

About US Page : The about us page can be inspired form the existing one the contact can be same. If you want we can add team pictures and information rest is sufficient.

Contact Us Page :

The details of all our phone number office addresses and social links can be presented here. The contact form should be present here instead of the footer.

The format of the contact form :

Your are : options will be Student , School, College , ORganisation

Mesasge : open text field

Phone Number:

Email :

Send button

The email should reach us at Technol.ltd@gmail.com

Header it can contain the page navigation and the logo

Footer – it can have the social links contact info like phone numbers and email addresses and small company logo. And if you wish important links if feasible.
